Publishing, Subscription, and Advertising Offices: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., or Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Published two issues/month (four volumes 1992)

Annual subscription rates (1992)

Annual Institutional Subscription Rate (1992): £1255.00 (US\$2280.00). Two-year Institutional Rate (1992/93): £2384.50 (US\$4332.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan include despatch by air and prices are available on request. Personal subscription rate for those whose library subscribes at the regular rate is available from any Pergamon Press office.

Application to mail at second class postage rate is pending at Rahway, NJ. Postmaster send address corrections to Computers & Structures, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

NUMBER 1

**T. Pagnoni, J. Slater,
R. Ameur-Moussa and
O. Buyukozturk**

M. D. Adley and M. H. Sadd

**F. París, A. Foces and
J. A. Garrido**

I. Senjanović and Y. Fan

T. W. Lim and W. D. Pilkey

**F. J. M. Starmans,
W. A. M. Brekelmans and
J. D. Janssen**

**B. P. Wang, D. Babu,
R. V. Nambiar and
K. L. Lawrence**

D. Givoli

**J. K. Kodikara and
I. D. Moore**

**M. N. Viladkar,
P. N. Godbole
and J. Noorzaei**

T. E. Tay

I. E. Harik and Ya-nan Fang

H. Vaziri

**J. R. Hwang and
Lien-Wen Chen**

**T. C. Ramesh and
N. Ganesan**

**D. P. Thambiratnam and
V. Thevendran**

1 A nonlinear three-dimensional analysis of reinforced concrete based on a bounding surface model

13 Continuum models for materials with lattice-like microstructure

19 Application of boundary element method to solve three-dimensional elastic contact problems without friction

31 A higher-order theory of thin-walled girders with application to ship structures

53 A solution to the inverse dynamics problem for lightly damped flexible structures using a model approach

61 A hybrid experimental-numerical method for linear structural mechanics

69 Shape design sensitivity analysis using closed-form stiffness matrix for hierachic triangular elements

77 A numerical solution procedure for exterior wave problems

85 Nonlinear interaction of solids with rigid surfaces

93 Space frame-raft-soil interaction including effect of slab stiffness

107 Finite element analysis of thermoelastic coupling in composites

113 Seminumerical solution to bending of sector plates and curved slabs of variable stiffness

125 Elasto-plastic analysis of hollow spheres under uniform pressures

129 Vibrations of thick composite circular plates

137 A finite element based on a discrete layer theory for the free vibration analysis of cylindrical shells

145 Axisymmetric free vibration analysis of cylindrical shell structures using BEF analogy

| | | |
|---|-----|---|
| S. A. Alghamdi | 151 | A computer algorithm for the static analysis of circular helicoidal bars |
| K.-C. Fu and D. Ren | 159 | Optimization of axially loaded non-prismatic column |
| J. Jirousek and M. N'Diaye | 163 | Hybrid-Trefftz p -method elements for analysis of flat slabs with drops |
| <i>Technical Notes</i> | | |
| N. I. Ioakimidis | 181 | Minimax approximation to stress intensity factors with MATHEMATICA |
| H. Matsuda, C. Morita and T. Sakiyama | 185 | An approximate method for analyzing tapered Mindlin plates |
| M. A. M. Torkamari and O. Y. H. Elsafi | 193 | Discrete methods of solution for dynamic linear and nonlinear problems |
| <i>Announcement</i> | | |
| | 203 | Second Symposium on Parallel Computational Methods for Large-Scale Structural Analysis and Design |

| M. F. Yang, C. C. Liang and C. H. Chen | 839 | A rational shape design of externally pressurized torispherical dome ends under buckling constraints |
| Y. J. Kang, S. C. Lee and C. H. Yoo | 853 | On the dispute concerning the validity of the Wagner hypothesis |
| C. S. Tsai | 863 | Analyses of three-dimensional dam-reservoir inter- actions based on BEM with particular integrals and semi-analytical solution |
| D. P. Thambiratnam and V. Thevendran | 873 | Simplified analysis of asymmetric buildings subjected to lateral loads |
| H. C. Chen | 881 | Evaluation of Allman triangular membrane element used in general shell analyses |
| S. T. Tan and C. K. Lee | 889 | Inversed rational B-spline for interpolation |
| Dongzhou Huang and Ton-Lo Wang | 897 | Impact analysis of cable-stayed bridges |
| J. Bortman and B. A. Szabó | 909 | Nonlinear models for fastened structural connections |
| F. Lebon and M. Raous | 925 | Multibody contact problem including friction in structure assembly |
| E. A. Orady | 935 | An automatic steplength control algorithm for stiff ODEs systems |
| G. D. Hahn and K. R. Sathiavageeswaran | 941 | Effects of added-damper distribution on the seismic response of buildings |
| S. C. Misra, S. C. Samanta and A. K. Chakrabarti | 951 | Transient magnetothermoelastic waves in a visco- elastic half-space produced by ramp-type heating of its surface |
| E. A. Sadek | 959 | Optimization of structures having general cross- sectional relationships using an optimality criterion method |
| P. K. Datta and M. K. Lal | 971 | Static stability of a tapered beam with localized damage subjected to an intermediate concentrated load |
| A. Der Kiureghian and C.-D. Wung | 975 | <i>Compendium</i> A computer-assisted learning system for random vibrations |

**S. Chockalingam,
T. C. Mathew, G. Singh
and G. V. Rao**

**N. Nakahira, K. Ozawa
and T. Mizusawa**

Technical Notes

995 Critical temperatures of hybrid laminates using finite elements

999 Vibration of beams with varying cross-sections by the Stodola-Newmark method

Announcements

1005 Second Symposium on Parallel Computational Methods for Large-Scale Structural Analysis and Design

1006 ICOSSAR '93

I Software Survey Section

NUMBER 6

**T. Zacharia Verghese and
C. S. Krishnamoorthy**

1007 A study of finite element and mathematical programming models for inelastic analysis of concrete framed structures

F. Zhang and D. Redekop

1019 Surface loading of a thin-walled toroidal shell

**T. Krauthammer and
R. D. Puglisi**

1029 Simplified analysis of buried reinforced concrete arches under simulated nuclear loads

G. Visweswara Rao

1041 Linear dynamics and active control of an elastically supported travelling string

**Dongyao Tan,
Qingshan Yang and
Chen Zhao**

1051 Discrete analysis method for random vibration of structures subjected to spatially correlated filtered white noises

**I. Younes and
S. Syngellakis**

1057 Transfer matrix analysis of asymmetric frame-shear wall systems

S. Tavares and P. Hajela

1067 Thermal/structural dynamic analysis via approximate analytical approach

E. S. Melerski

1075 Probabilistic computer analysis of circular rafts by the method of realizations

H. P. Lee

1085 Fundamental frequencies of annular plates with internal cracks

**K. S. Sivakumaran,
Min-Shay Lin and
Pisidhi Karasudhi**

1091 Seismic analysis of asymmetric building-foundation systems

**K. S. Sai Ram and
P. K. Sinha**

1105 Hygrothermal bending of laminated composite plates with a cutout

P. Fuschi, D. Perić and D. R. J. Owen 1117 Studies on generalized midpoint integration in rate-independent plasticity with reference to plane stress J_2 -flow theory

T. S. Sankar, S. Anantha Ramu and R. Ganesan 1135 Variability of SIF and COD of stochastic structural systems

S. P. Sun and S. M. Rao 1147 Application of the method of moments to acoustic scattering from fluid-filled cylinders using three different formulations

V. A. Permyakov and A. M. Remennikov 1155 General purpose code for steel structures optimal design

K. Guru Prasad and J. H. Kane 1165 Boundary formulations for sensitivities of three-dimensional stress invariants

Technical Notes

A. Y. Kavasoglu and T.-L. Wang 1175 Modified moment distribution method for reinforced concrete equivalent frames

A. Y. T. Leung and Y. F. Liu 1183 A generalized complex symmetric eigensolver

V. Paramasivam, S. P. Thulasi Ramachandre Gowda and D. Muthiah Raj 1187 Timoshenko beam finite element with four DOF and convergence of $O(h^4)$

R. R. Reddy, A. Gupta and R. P. Singh 1191 Heuristic, symbolic logic and knowledge-based approach to the design and construction of buildings

P. K. Datta and M. K. Lal 1199 Parametric instability of a non-prismatic bar with localized damage subjected to an intermediate periodic axial load

Announcement
